

AIG Parent Night

THE POWER OF MINDSET

What is mindset and what role does it play in our children's achievement and success?

Dr. Carol Horn and Kirsten Maloney will share how children with a growth mindset show greater motivation in school, become better problem-solvers, and learn to embrace challenges and setbacks.

Participants will explore how mindset can impact learning and personal growth, the latest brain research on mindset and learning, and the kinds of praise that foster a growth mindset. Learn how a growth mindset allows children to take on challenges and creatively solve problems because they believe that they can.
